About the Backled

The Britelight Backled is a versatile LED panel, available in light colors 3000K and 4000K. There are various dimming options, including the 'dim to warm' function. The LED panel is also available in an RGB version. For installation in non-suspended ceilings, a surface mount frame is included. With a standard CRI >80, but also available with CRI >90, the Backled offers optimal light quality for any space.
